Office Action Summary	Application No. 10/669,902	Applicant(s) BURNETT ET AL.	
	Examiner Joseph C Rodriguez	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 14-16 in the reply filed on 12/16/04 is acknowledged. The traversal is on the grounds that no serious burden exists. This is not found persuasive as the non-elected claim grouping contains multiple apparatus claims that are so broadly claimed as to require *multiple* searches outside of the sorting, class 209, and metal treating, class 164, arts. This type of expansive search is clearly burdensome.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-9 and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim.

Specification

Claims 15 and 16 are objected to because of the following informalities:

Claim 14 reads "A method", thus the claims depending therefrom should read "The method".

Claim 14, line 8, should read "under control of the program".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the stroller" (ln. 2). There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Bickford et al. ("Bickford")(US 4,779,163).

Bickford teaches a method comprising maintaining a fluidized bed in a tank (Fig. 1, col. 3, ln. 25-43); maintaining a controller (32, 33) and at least one program which runs on the controller (col. 4, ln. 6-28 teaching use of variable timing and different sequencing instructions); maintaining a crane (Fig. 2, support 29) which is controlled by the controller and supports a perforated cage (30); causing the controller to move the perforated cage to a sequence of positions "with" (i.e., within) the tank, under control [of] the program, and then remove the perforated cage from the tank (col. 3, ln. 54-col. 4, ln. 28). Here, a program can be regarded as a set of instructions, thus the different tests,

involving different timing and sequencing instructions being delivered to the controller, can be regarded as different programs that run on the controller (Id.).

Allowable Subject Matter

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any references not explicitly discussed above but made of record are considered relevant to the prosecution of the instant application.

In particular, the movable baskets and associated systems taught by Eggert (US 1,860,022; Fig. 3) and Bonnemasou et al. (US 5,423,370; Fig. 1, 2) should be noted.
